PROFESSIONAL SUMMARY

- Computer Science student and Full Stack .NET Developer with hands-on experience in ASP.NET Core, RESTful APIs, SQL Server, and Entity Framework Core. Skilled in building scalable web applications, implementing secure authentication and authorization, and applying Clean Architecture, Dependency Injection, and SOLID principles. Passionate about backend development, software architecture, and building reliable, high-performance applications.

EDUCATION

Bachelor of Computer Science

10/2024 – present

Zagazig University

- GPA: 3.5/4.0 (Expected Graduation: 2027)

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer

12/2025 – 07/2026

Digital Egypt Pioneers Initiative - DEPI

- Developed backend services using C# and ASP.NET MVC, implementing business logic and database integration.
- Built and maintained RESTful APIs following best practices for performance and maintainability.
- Implemented database operations and business logic using Entity Framework Core and SQL Server.
- Applied MVC Architecture, Dependency Injection, and SOLID Principles in real-world projects.
- Developed responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated within development teams using Git and modern software development workflows.

Web Development using .NET trainee

07/2025 – 09/2025

ITI - Information Technology Institute (Zagazig)

- Designed and maintained relational databases using Microsoft SQL Server.
- Developed backend functionality and business logic using C# and ASP.NET MVC.
- Implemented data access layers and database operations using Entity Framework.
- Built dynamic web applications following MVC design patterns and software engineering best practices.
- Worked with LINQ, database relationships, and CRUD operations to create data-driven applications.
- Gained hands-on experience in full software development lifecycle, from database design to deployment-ready applications.

PROJECTS

Matamak – Restaurant Ordering & Management System

ASP.NET Core (.NET 10) • SQL Server • EF Core • JWT • SignalR • Clean Architecture

<https://github.com/Mostafa2115/Matomak> 📄

- Built scalable RESTful APIs using ASP.NET Core (.NET 10).
- Collaborated with frontend developers to integrate Angular dashboards with REST APIs.
- Implemented JWT Authentication and Authorization with SignalR for real-time order updates.
- Integrated Stripe payment gateway.
- Designed SQL Server database using Entity Framework Core.
- Applied Clean Architecture and Repository Pattern.

TASWOQ – E-Commerce Platform

ASP.NET Core MVC • SQL Server • Entity Framework Core • Bootstrap

<https://github.com/Mostafa2115/TASWOQ> 📄

- Developed a full-stack e-commerce web application for browsing and purchasing products.
- Implemented user authentication and authorization with secure account management.
- Designed and integrated a SQL Server database using Entity Framework Core.
- Developed product management, shopping cart, and order processing modules.
- Created a responsive and user-friendly interface using Bootstrap.
- Implemented layered architecture and reusable components to improve maintainability.

SKILLS

Languages: — C#, C++, JavaScript

Backend Development: — ASP.NET Core, RESTful APIs, Entity Framework Core, JWT Authentication, MVC, Clean Architecture

Frontend Development: — HTML5, CSS3, Bootstrap, Tailwind CSS

Databases: — Microsoft SQL Server, MySQL

Tools & Technologies: — Git, GitHub, Visual Studio, VS Code, Swagger, Postman

Core Concepts: — OOP, SOLID Principles, LINQ, Data Structures & Algorithms

VOLUNTEERING EXPERIENCE

ICPC Zagazig University Community Technical Team member • Solved algorithmic and competitive programming problems covering data structures and algorithms. • Applied problem-solving techniques to optimize solutions for time and memory constraints. • Improved analytical thinking, debugging, and coding efficiency through regular contests and training sessions. • Collaborated with team members to discuss and evaluate different solution approaches.	01/2025 – Present
GDG On-Campus Zagazig Back End Core Team Member • Contributed to the design and development of backend applications using modern software engineering practices. • Collaborated with team members on implementing scalable and maintainable backend solutions. • Participated in technical discussions, code reviews, and knowledge-sharing sessions.	10/2025 – 07/2026
Back End .NET member Zag Eng Family • Participated in backend development activities and technical workshops focused on .NET technologies. • Collaborated with team members on developing and improving backend components and APIs. • Enhanced skills in ASP.NET Core, database design, and software architecture concepts. • Contributed to technical discussions and knowledge-sharing initiatives within the team.	10/2025 – 07/2026
