PROFESSIONAL SUMMARY

Computer Science student and Full Stack .NET Developer specializing in building scalable, high-performance web applications and RESTful APIs. Strong expertise in ASP.NET Core, SQL Server, and database design, with a solid understanding of clean architecture and backend system design. Experienced in developing robust backend systems, implementing secure authentication mechanisms, and designing efficient, structured databases for real-world applications. Also familiar with Laravel (PHP), MySQL, and frontend fundamentals, enabling a well-rounded understanding of the full development lifecycle. Focused on continuously improving skills in the .NET ecosystem and system design, with a strong interest in building reliable, scalable, and production-ready backend solutions.

EDUCATION

Zagazig University 10/2024 – present
Level 3 / GPA 3.5 / Bachelor of Computer Science Zagazig, Sharqia

PROFESSIONAL EXPERIENCES

Full Stack .NET Developer 12/2025 – Present
Digital Egypt Pioneers Initiative - DEPI

- Developed backend applications using C# and ASP.NET Core
- Built scalable RESTful APIs using .NET Core Web API
- Designed responsive frontend components using HTML, CSS, and JavaScript
- Applied MVC architecture in building modern web applications

Back End .NET member 10/2025 – Present
Zag Eng Family

- Participated in backend development tasks and technical collaboration

Web Development using .NET trainee 07/2025 – 09/2025
ITI - Information Technology Institute (Zagazig)

- Designed SQL Server databases
- Implemented backend business logic using C#
- Built data access layers using Entity Framework
- Developed web applications using ASP.NET MVC

Back End member 11/2024 – 09/2025
IEEE CS Zagazig Student Chapter

- Worked on backend development projects
- Gained experience in MySQL, PHP, Laravel, Node.js, Express.js, and MongoDB

SKILLS

Programming Languages: — C++ , Python , JavaScript , PHP , C#
Backend Development: — ASP.NET Core , .NET Core Web API , Laravel
Frontend Development: — HTML5 , CSS3 , Tailwind CSS , Bootstrap
Databases & Storage: — Microsoft SQL Server , MySQL , Entity Framework
Tools & Technologies: — Git , GitHub , MVC Architecture , RESTful APIs
Core Concepts: — Problem Solving , Competitive Programming , Data Structures , Algorithms , OOP

LANGUAGES

Arabic ● ● ● ● ● English ● ● ● ● ●

VOLUNTEERING EXPERIENCES

GDG On-Campus Zagazig 10/2025 – Present
Back End Core Team Member

- Contributed to backend system design and implementation
- Collaborated with development teams in building scalable software solutions

ICPC Zagazig University Community 01/2025 – Present
Technical Team member

- Solved competitive programming problems
- Applied advanced algorithms and data structures
- Strengthened analytical and optimization skills

PROJECTS

Hogwarts for programming [🔗](#)

- Built a gamified educational platform for learning programming
- Implemented MVC architecture using Native PHP

E-Commerce-Platform [🔗](#)

- Developed full-feature online shopping platform using Laravel
- Implemented user authentication and order management

Digital-Library-API [🔗](#)

- Built RESTful API using Node.js, Express.js, and MongoDB
- Implemented authentication, subscriptions, and book management

Balloon-Game [🔗](#)

- Developed 2D game using Java Swing
- Implemented OOP principles and collision detection

Task-Tracker [🔗](#)

- Task Tracker is a web application designed to help you manage your tasks efficiently.
- With a user-friendly interface and powerful features, you can easily create, update, and delete tasks as needed.
